DelMiRA Resources

DSAMH staff have access to the following resources:

Athens - Athens allows remote access to most of the resources listed below for everyone affiliated with DelMIRA member institutions. Go here: https://register.athensams.net/delmira/ to register for remote access for these resources.

CINAHL - Cumulative Index of Nursing and Allied Health Literature.

DynaMed – a point-of-care tool, DynaMed provides evidence-based topic reviews on nearly 2,000 disease specific topics. DynaMed is updated daily, and also includes patient education handouts.

Health Business Elite Full Text – a database created specifically for healthcare administrators, Health Business Elite contains full text content from over 450 journals, some dating as far back as 1965.

MDConsult – is a cross-searchable compendium of over 50 textbooks in a wide array of disciplines, as well as over 100 journals, patient education handouts, drug information and current medical news. Physicians also have the opportunity to gain CME credits by utilizing MDConsult.

MEDLINE - the premiere index of biomedical literature produced by the **National Library of Medicine**.

New England Journal of Medicine – provides full text online access to the most current issue, plus full text back to 1993. Also included are procedure videos and the ability to download audio files of certain articles to an iPod or a PDA.

Nursing Reference Center - point-of-care resource intended for staff nurses, nurse administrators, nursing students, nurse faculty, and hospital librarians.

OVID Electronic Journals – participants chose approximately ten titles that most closely fit individual hospital specialties. Available titles include *Annals of Internal Medicine, American Journal of Medicine,* and *Circulation.*

Psychiatry Online – user-friendly resource with several full text journals, textbooks, and books, focused on the topics within the behavioral health field. Also provides patient and family information, and self-learning assessments. Only available (at this point) while on the Herman Holloway campus at http://psychiatryonline.com. In the near future, will be available through Athens.

STAT!Ref – cross-searchable compendium of approximately 25 mostly-nursing related textbook titles. Also includes access to ACP PIER. Produced by the American Academy of Physicians, PIER (Physicians' Information and Education Resource) is a Web-based decision-support tool designed for rapid point-of-care delivery of up-to-date, evidence-based guidance for clinicians. Information in PIER is presented in a "drill down" format, in which the user clicks from an opening guidance statement through to more specific information.

TDNet - provides "one-stop-shopping" for print and electronic journal holdings. Search by journal title, see your institution's print and electronic holdings, link to the full text, or link to the table of contents.

VisualDX - visual clinical decision support software. VisualDX provides instant access to over 16,000 images that can help diagnose more than 900 visually identifiable diseases, drug reactions, or infections. Although VisualDX is not a resource available as part of the DelMIRA package, it is promoted here because the Delaware Division of Public Health has purchased a three-year license for every hospital in Delaware.

What does the DSAMH Medical Library have for you?

Easy access to resources **ANYWHERE** on campus! Just visit: http://www.delmira.org and click into the "Resources" tab for INFORMATION at your fingertips!

So you're at *home* or **OUT** and **ABOUT** and you're just plain curious?

Register through Athens, here:
https://register.athensams.net/delmira/

And thereafter log-in with your username and password here:
http://auth.athensams.net/my/

For reference, you can write down your username/password here:
My Athens Username   _____
My Athens Password   _____

For assistance, call/visit/email the Medical Librarian in the DSAMH Medical Library:
Susanne Ingle, MSIS, MLS   302/255-2789   susanne.ingle@state.de.us
